

Fuel Waiver Concerning Summer Gasoline – April 25, 2020

The State of New Hampshire, acting through the New Hampshire Department of Environmental Services, in coordination with the New Hampshire Department of Agriculture, Markets & Food, concurs with all actions included in the [March 27, 2020, U.S. EPA waiver](#) to minimize or prevent further disruption of an adequate supply of gasoline to customers. The State of New Hampshire hereby asserts that, given the language and purpose of RSA 438:20, and the contents and purpose of the referenced NIST Handbook 130, there is no independent State provision requiring the use of low volatility gasoline during summer months as referenced in 40 CFR 80.27-78. Distributors need only ensure that they abide by applicable federal requirements as modified by waiver.
